RE: Central Maine Power Company's Maine Power Reliability Program
Site Location of Development Act Application
Volume I – Section 6.0 Visual Quality and Scenic Character

Dear Beth:

Last month on, or about, June 12th a representative of Central Maine Power Company (CMP) delivered a copy of CMP's Maine Department of Environmental Protection application for the Maine Power Reliability Program. As you may recall this was a very large document consisting of several 3-ring binders. It has come to our attention that a few pages from Volume 1, Section 6.0 Visual Quality and Scenic Character of the Site Location of Development Act were inadvertently omitted.

Enclosed is a revised copy of the narrative part of Section 6.0 Visual Quality and Scenic Character. Please remove pages 6-1 through 6-248 in the binder you currently have and replace them with the enclosed revised pages. The first page following the newly added materials should be entitled EXHIBIT 6-1 Transmission Line Photo Examples.

In addition, a revised Table of Contents is provided. Please replace the existing Table of Contents at the very beginning of Volume I and replace with the revised version.

Thank you for your cooperation and I apologize for any inconvenience that this may have caused.

Sincerely,

David R. Dominie
Senior Environmental Specialist
